

The Itch Clinic

Allergy, Dermatology, and Otolaryngology

Dr. Keith A Hnilica DVM, MS, DACVD

We want to HELP YOU help your Patients

Cytopoint NOT working well enough?

Tired of DEFENDING Apoquel and steroids?

Allergy and Infection misery TOO much & TOO often?

Time to Be the HERO?

Allergy Desensitization Vaccine IS the GOLD STANDARD in people and pets

and is BETTER - FASTER - SAFER than in people

Allergy Vaccine Therapy is **85% effective** in dogs and works in 4-6 weeks

Allergy Vaccine Desensitization Therapy has a **60% cure rate** after 2 years

Allergy shots have LESS than a 5% side-effect rate (usually mild itch post-injection)

WHAT WE DO TO MAKE THE VACCINE SO EFFECTIVE AND SAFE?

Allergy **SKIN** Testing is more accurate than blood/serum testing

Our typical Allergy Skin Test identifies **OVER 25** reactive allergens per patient

We include **ALL** positive reactions in the vaccine - average of 28 allergens

WE actively monitor and adjust the dose and frequency to **OPTIMIZE** the response

We **COMBINE** other safe and beneficial immune modulators to induce T-cell switching

We want to help YOU help your patients
